PROFILE

Full Stack Developer who designs and ships **production systems end-to-end** — multi-tenant SaaS, mobile apps, and LLM-powered services — from architecture and data modeling to deployment, CI/CD, and security hardening. I specialize in taking **AI from demo to production**: multi-provider LLM orchestration with automatic fallback, agentic workflows with tool-use, OCR/document intelligence, and reliable automation at scale.

EXPERIENCE

Full Stack Developer · Visol

2025 – Present

Internship · Nova Friburgo, RJ (Hybrid) — solar-energy SaaS & CRM platform

- Designed and shipped **Vivi AI**, Visol's production conversational assistant (**vivi.visol.app**): a Python/FastAPI microservice with **multi-provider LLM orchestration** (OpenAI, Claude, Gemini) and automatic fallback, an intent-handling agent with **tool-use**, state-machine guided onboarding, and multi-turn conversation memory — serving an Angular web app and an Ionic mobile app.
- Ensured reliability with a **1,900+ automated test suite (99.9% pass)**, retry/backoff (Tenacity), a permission-translation layer over Visol's licensing model, and **GitHub Actions CI/CD**.
- Led the **security hardening** of the PHP core (OWASP): fixed **SQL Injection & IDOR**, added **SSRF protection**, webhook **HMAC** verification, **OAuth CSRF** protection, secrets migration to environment variables, and anti-bot CAPTCHA.
- Integrated the franchise hub with the core platform across the Angular CRM and the Ionic mobile app.

Full Stack & SaaS Developer · Freelance / Independent

2024 – Present

Solo-built multi-tenant SaaS across HealthTech, Solar Energy, Sports & Education

- Delivered complete products from scratch — architecture, backend, frontend, mobile, deployment, and third-party integrations (Google Ads, Meta Graph API, Firebase, OneSignal, ANVISA).
- Pecci Cuidado Integrado** (client) — clinical management platform for appointments and patient-evolution tracking, in production (Flask · PostgreSQL).

SELECTED PROJECTS

EvoSolar Franquias

Solar Energy · SaaS

Multi-tenant franchise platform — **34 modules / 83k+ LOC**, Google Ads & Meta API (OAuth), Gemini AI agents, real-time WebSocket chat with SLA, automated royalty calculations.

FastAPI · React · React Native · PostgreSQL · Redis · Celery · Docker

Zelo App

HealthTech · SaaS

Medication-management platform — **multi-LLM chain with fallback**, medication **OCR enriched with the ANVISA catalog**, timezone-aware scheduling, 38 endpoints, LGPD compliance.

FastAPI · React Native · Expo · PostgreSQL · Celery

Fantasy Picks

Sports & Gaming · SaaS

Async-first fantasy sports — real-time data from **12+ leagues** (football-data.org), dual-balance wallet, Clean Architecture with repository pattern.

FastAPI · Next.js 14 · TypeScript · Tailwind · PostgreSQL

Cesh

Education · Social

Academic social network — **zero-credential portal sync** via browser extension, GitHub Copilot Chat integration (OAuth Device Flow), 190+ PHP files (PSR-4).

PHP 8.3 · Slim 4 · MySQL · Docker · AWS S3
